**PACE's team of physicians includes specialists in General Cardiology, Electrophysiology /Arrhythmia, Interventional Cardiology, Internal Medicine, and Diabetes.**

**PATIENT INFORMATION**

NAME: \_\_\_\_\_  M  F DATE OF BIRTH \_\_\_\_\_

TELEPHONE: \_\_\_\_\_ APPOINTMENT DATE: \_\_\_\_\_

HEALTH #: \_\_\_\_\_ VRS. CODE \_\_\_\_\_ APPOINTMENT TIME: \_\_\_\_\_

**CARDIOLOGY PROCEDURES**

- Adult ECHO
- Contrast ECHO
- Stress ECHO
- Stress Test
- Event Loop Recorder (ELR)
- 12 Lead ECG
- 24 hrs. Holter Monitor
- 48 hrs Holter Monitor
- 72 hrs. Holter Monitor
- 14 day Holter Monitor
- 24 hrs ABP Monitor (\$50)

**DOCTOR CONSULTATION\*\***  
 Elective  Urgent

If test is abnormal please arrange for a consultation

**PEDIATRIC CARDIOLOGY**

- Pediatric ECG
- Pediatric ECHO
- Pediatric Holter Monitor  24 hrs  48 hrs  7 day  14 day

**CARDIO METABOLIC CLINIC**

The clinic's theme is the management of Type II Diabetes in patients with documented vascular disease to improve glycemic control and reduce further cardiac complications. Our physicians will work collaboratively with the patient's GPs and/or endocrinologists.

**REASON FOR REFERRAL**

Patient consents to electronic communication of personal health information using email address and/or phone number provided, as explained at www.pace-cardiology.com

**Requests for consultations should include the reason for referral, medication list and any previous ECGs, chest x-rays, blood work and cardiac assessment**

**\*\* Please be advised we will send you a fax confirmation with your patient's appointment date and time — please contact your patient with this information**

## COMMON INDICATIONS FOR TRANS-THORACIC ECHOCARDIOGRAPHY

- Heart murmur
- Chest pain
- Shortness of breath and / or peripheral edema
- CHF
- Unexplained hypotension
- Hypertension
- Stroke or TIA
- Syncope
- Arrhythmia and palpitations
- LBBB or high grade AV block
- LV function after:
  - MI
  - Invasive procedure
  - Every 6 months for patients with severe LV dysfunction
  - Every year with ischemic heart disease
- Rule out endocarditis
- Rule out aortic dissection
- Rule out or follow-up of a pericardial effusion
- Rule out or follow-up of pulmonary hypertension
- Initial assessment or reassessment of a patient with structural heart disease:
  - Valvular regurgitation (every 6-12 months)
  - Valvular stenosis (every 6-12 months)
  - Mitral valve prolapse
  - Cardiomyopathy:
    - Ischemic
    - Dilated
    - Hypertrophic
  - Congenital heart disease
  - Prosthetic heart valves (every year)
  - Cardiac masses
- Evaluation before or after an invasive procedure:
  - Heart surgery
  - PCI
  - Electrophysiology procedures
  - Device placement
  - Structural heart disease procedures
    - TAVI
    - LAA or VSD closure

## COMMON INDICATIONS FOR STRESS ECHOCARDIOGRAPHY

- Chest pain
- CHF
- LV dysfunction
- Arrhythmia
- Syncope
- Stroke / TIA or carotid disease (once a year)
- PAD (once a year)
- Assessment of patients at intermediate or high risk of CAD (every 2 years)
- Within 3 months post ACS / MI and every year thereafter
- In patients with:
  - Valvular stenosis
  - Valvular regurgitation
  - Hypertrophic cardiomyopathy
- Pulmonary hypertension
