Patient consents to electronic communication of personal health information using email address and/or phone number provided, as explained at www.pace-cardiology.com

**Requests for consultations should include the reason for referral, medication list and any previous ECGs, chest x-rays, blood work and cardiac assessment**

**\*\* Please be advised we will send you a fax confirmation with your patient's appointment date and time — please contact your patient with this information**

## COMMON INDICATIONS FOR TRANS-THORACIC ECHOCARDIOGRAPHY

- Heart murmur
- Chest pain
- Shortness of breath and / or peripheral edema
- CHF
- Unexplained hypotension
- Hypertension
- Stroke or TIA
- Syncope
- Arrhythmia and palpitations
- LBBB or high grade AV block
- LV function after:
  - MI
  - Invasive procedure
  - Every 6 months for patients with severe LV dysfunction
  - Every year with ischemic heart disease
- Rule out endocarditis
- Rule out aortic dissection
- Rule out or follow-up of a pericardial effusion
- Rule out or follow-up of pulmonary hypertension
- Initial assessment or reassessment of a patient with structural heart disease:
  - Valvular regurgitation (every 6-12 months)
  - Valvular stenosis (every 6-12 months)
  - Mitral valve prolapse
  - Cardiomyopathy:
    - Ischemic
    - Dilated
    - Hypertrophic
  - Congenital heart disease
  - Prosthetic heart valves (every year)
  - Cardiac masses
- Evaluation before or after an invasive procedure:
  - Heart surgery
  - PCI
  - Electrophysiology procedures
  - Device placement
  - Structural heart disease procedures
    - TAVI
    - LAA or VSD closure

## COMMON INDICATIONS FOR STRESS ECHOCARDIOGRAPHY

- Chest pain
- CHF
- LV dysfunction
- Arrhythmia
- Syncope
- Stroke / TIA or carotid disease (once a year)
- PAD (once a year)
- Assessment of patients at intermediate or high risk of CAD (every 2 years)
- Within 3 months post ACS / MI and every year thereafter
- In patients with:
  - Valvular stenosis
  - Valvular regurgitation
  - Hypertrophic cardiomyopathy
- Pulmonary hypertension
